## Interim supplement report

This report serves as a supplement to the [November 1 deadline update](#) originally released on November 15, 2023. This report contains the same visualizations as the original report, but with percentage change calculations in the visualizations based on prior season values (2022–23) rather than the last pre-pandemic season (2019–20).

This supplement is based on application volume through November 1 for the 834 institutions that have been a part of the Common App membership since 2019–20 (as in the original report). Note that some of the counts will have changed slightly since the original report was released, since most demographic values are not time-stamped in our data warehouse.

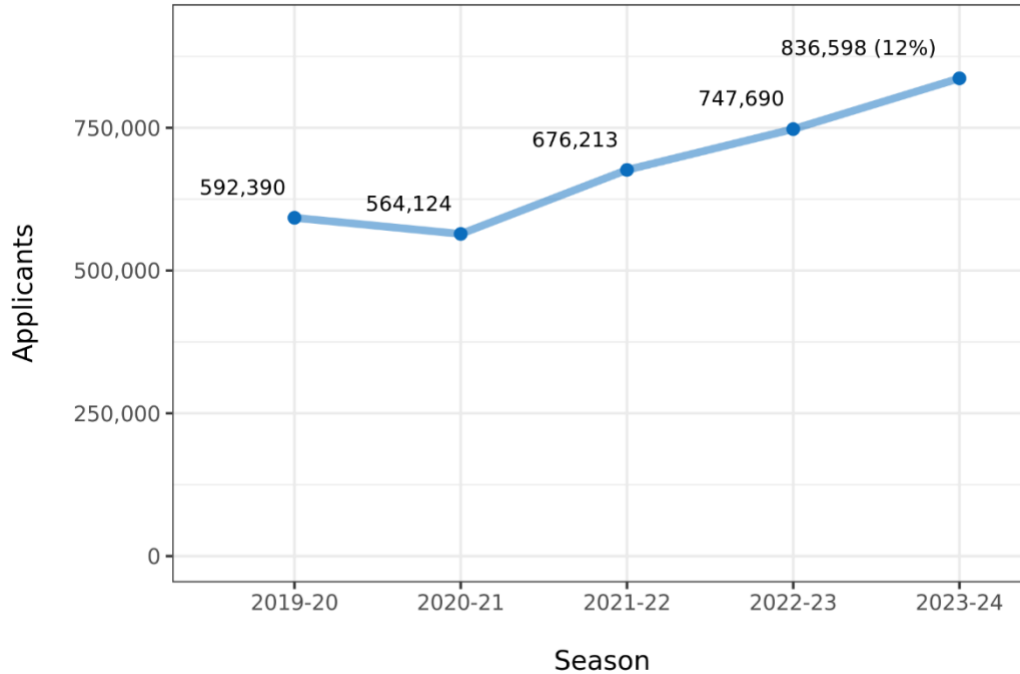

**Figure 1. Growth in first-year accounts created by students intending to enroll in the following academic year since 2019–20**

Percentage change value compares current season (2023–24) to prior season (2022–23)
